PLACE ACQUIRED

25X1

THIS IS UNEVALUATED INFORMATION

I. IDENTIFICATION DATA:

Reference Enclosure 1, [redacted] "Brasov", 25X1
Scale 1:100,000, pinpoint location of Chemical Combine No. 1 (Combin-
atul Chemic No. 1).

Point 1. Installation Area - Approximate boundary indicated by
broken line. Shaded area indicates area observed by
Source.

Point 2. Dirt Road - leading south from Fagaras /N 45-51, E 24-59/
to Ileni /N 45-48, E 25-01/ [redacted]

25X1

Point 3. Rail Line - single track, normal gauge. Believed [redacted]
[redacted] to be used solely for servicing the Chemical
Combine. Entrance of rail line to installation thought 25X1
to be in Southeast section. A normal gauge rail line

CONFIDENTIAL

USAF review completed.

was observed [] within the installation area.

25X1

Point 4. Rail Line - single track, normal gauge. Principal line leading from Brasov West to Sibiu and passing through Fagaras.

Point 5. Highway - principal road leading from Brasov West to Sibiu and passing through Fagaras.

II. SITE LAYOUT:

Reference Enclosure 2. [] sketch of section of installation observed.

25X1

Point 1. Rail Line - (Same as Point 4, Enclosure 1)

Point 2. Fagaras Railroad Station - a small stuccoed brick building.

Point 3. Rail Line - (Same as Point 3, Enclosure 1).

Point 4 - Dirt Road - (Same as Point 2, Enclosure 1).

Point 5 - Fence - Wood picket, 1½ m. high, extended East from entrance, Point 17. []

25X1

Point 6. Dirt Road - four to six meters wide. Leading from dirt road, Point 4, to entrance.

Point 7. Creek - flowing North and paralleling East boundary of installation.

Point 8. Workers' Housing - (Indicated by shaded area.) Wooded area obscuring most of one-story houses. []

[] a two-story stuccoed house was used primarily for visiting officials. Housing area included a small theater. Armed guards were observed patrolling along fence (Point 13) which separated the housing area from installation.

25X1

Point 9. Entrance - Wide enough for truck traffic. Small guard shack on South side of entrance within installation area.

Point 10. Office Building - Stuccoed brick, one story, roof []

[] it was three to four times longer and wider than guard building, Point 15. []

25X1

25X1

Point 11. Office Building - 30 to 35 m. by 30 to 35 m., two-story, concrete or stucco, [] Housed office of chief engineer and technical planning section.

25X1

Point 12. Building - Believed [] to be constructed of some kind of metal and containing work shops. 16 to 17 m. by 18 m. by 8 to 10 m. []

25X1

25X1

Point 13. Fence - Wooden picket, 1½ m. high. Led along East perimeter of installation area. Armed uniformed guards observed patrolling outside fence.

III. GENERAL INFORMATION:

In August or September 1953, [] Engineer JUGANARU, from the General Directorate of Processing (Directia Generala de Prelucratoare) sent to this installation to hand carry some instructions from the Technical Directorate of the Ministry of Chemical Industry in regard to industrial safety measures and to determine what steps had been taken to organize the Technical Section of the installation. The General Directorate was responsible for Chemical Combine No. 1 in Fagaras. A Technical Section existed in every organization and plant, maintaining a specialized library and a file of labor standards which could be consulted by the workers, []

25X1

25X1

25X1

JUGANARU

[] turned over the documents concerning labor safety measures. [] attempted to contact the engineer in charge of the Technical Section but learned that he was not at the installation at the time. In approximately an hour [] JUGANARU escorted from the installation to a workers' housing area where spent the night. The following day [] JUGANARU remained to settle the business with the Technical Section. [] JUGANARU was to go to another installation at Ucea /N 45-45, E 24-42/ the following day to inspect the Technical Section of the Chemical Combine at that location.

25X1

25X1

25X1

25X1

[] Chemical Combine No. 1 in Fagaras produced explosives and ammonia and [] the plant extended a considerable distance West and South of the area []

25X1

25X1

[] two Soviet advisors were connected with the installation. []

25X1

[] over 5,000 persons were employed at the installation. [] this installation was known to be larger than the Metallo-Chemical Combine (Combinatul Metallo-Chimic) in Tarnaveni /N 46-40, E 24-30/, which employed between 4,000 and 5,000 workers. [] had seen large workers' housing projects in the vicinity of this installation.

25X1

25X1

Chemical Combine No. 1, Fagaras, was one of the most important chemical combines in Rumania in regard to production of strategic chemical products.
